

# GABRIEL PENTEADO

## Full Stack Software Engineer

A dedicated front-end developer who also has a solid knowledge of back-end technologies. One of my strongest qualities is my ability to effectively tackle and solve problems, a skill I honed through programming. Find more about me and all my projects in **my Portfolio**.

## WORK EXPERIENCE

### BLIP – Flutter

Mar 2025 - Present

- Create innovative solutions for Betfair | Flutter Entertainment, improving their web platforms.
- Manage BFF (Backend-for-Frontend) layer for frontend-backend communication via REST APIs and streaming.
- Build scalable, high-performance React apps with TypeScript and Node.js.

### 100Devs

Jan 2024 - Feb 2025

- Developed responsive web applications using React, TypeScript, Node.js, MongoDB.
- Create responsive user interfaces and build server-side logic and APIs.
- Ensure seamless integration, optimize performance, and write clean, maintainable code.

### GAP Digital

Feb 2021 - Nov 2023

- Developed full-stack client projects using technologies like React, TypeScript, Next, Java, Spring, PostgreSQL.
- Design and build full-stack solutions for clients, creating responsive user interfaces.
- Collaborated on user-friendly feature design for optimal performance and usability.

## LANGUAGES

- English
- Portuguese

## EDUCATION

- **CS50** - Harvard University
- MOOC Java I & II - Helsinki University

## SKILLS & TOOLS

- JavaScript
- React
- TypeScript
- Next
- Redux
- Node
- Java
- TailwindCSS
- Git
- Angular
- Vue
- MongoDB
- GraphQL
- Docker
- PostgreSQL
- Spring
- Jest
- GitHub

## PROJECTS

### Dental Procs

[youtube](#)

[website](#)

[github](#)

React - TypeScript - TailwindCSS - Node - Prisma - MySQL

A specialized application designed for dentists to monitor the most performed procedures in their clinics and track performance trends over time.

- Complex data system implemented with Day.js library.
- Accessible design system using RadixUI library.
- Data validation with Zod library.
- Modern pie chart created with ApexCharts library.

### Oh My Donuts

[youtube](#)

[website](#)

[github](#)

Vue - Vuex - Sass

A Vue and Vuex-based app for easily placing and managing donut orders.

- Vuex for smooth state management
- Vue Router to handle navigation
- Reusable form components and custom SASS buttons.

### API Java SpringBoot Docker

[github](#)

Java - SpringBoot - Docker - JWT - PostgreSQL

A RESTful API developed using Java Spring Boot and Docker features system authentication implemented with Spring Security and JSON Web Tokens (JWT)
